"By adopting this course, every voter in the State. whether American or Republican, can vote his sentiments as to the presidential preferences: while, by uniting all the elements of opposition to the present pro-slavery administration, we may be enabled to restore freedom to Kansas, and secure the triumph of true American principles." The Cincinnati Gazette endorses the foregoing as

follows "Several days ago we suggested the propriety of having but one electorial ticket in Ohio for the re-temporary in Indiana that the plan, if generally carried out in good faith, would make certain the defeat of the democratic nominees in nearly, if not quite, every free State; while the Southern States, where the opposition are united upon the American platform and the American candidates, would have a free field to fight their own battles in their own way.

"The United States steamship Merrimack, Capt. G. J. She ran as far East as Cape Sable, and then ran down the Gulf stream to the latitude of the capes of Virginia, without falling in with any vessels in distress, but experienced several severe gales and a heavy snow-storm. TARTAR SHEEP .- In a communication, originally published in the Progressive Farmer, Dr. Emerson of Philadelphia gives some interesting information relative to this new breed of sheep, lately introduced into the United States from China. He describes them as of good size, with prominent or Roman noses, ears drooping forward, and agreeably expressive faces, which are covered with fine glossy hair. The fleece is unshrinkable, and best adapted to the breed for felting purposes and coarser fabrics. The value of the breed, he thinks, consists mainly in the remarkable facility it offers to supply animal food of the most excellent quality, almost at pleasure, the ewes having lambs twice a year, from two to four at a time. An ewe belonging to him brought three lambs in February, 1855, all of which were raised to maturity. Early in November she had two lambs more, while her two February ewe lambs each brought a lamb at the same time, making her a grandmother in nine months, and her progeny within that

With respect to the qualities of the meat, the Doctor states that, when in China several years ago, he was not a little surprised to observe the eagerness manifested for matton. Although capons, game and other luxuries were common upon the tables, he never saw a leg of Tartar mutton introduced where anything was left but bones. He attributed this relish for mutton to its high price, ordinarily about 50 cts. per pound. But he was afterwards convinced, that, after making due allowance for the cost, there was still more due to the intrinsic good qualities of the meat, which is entirely free from any woolly or other disagreeable taste, and remarkably delicate. Schr. Southern Belle, O'Brien, from New York, to J. H. to quantity and quality. Corron-The market has ruled very quiet since our last

review, and we reduce quotations 164 cent. The unfavorable advices from other markets has caused some depression here, and buyers are unwilling to operate unless at a concession in prices, which holders do not seem disposed to accede to; in consequence of this fact the transactions have been confined to two or three small parcels at 91 cents for strict middling,91 cents for assorted grades and 101 cents W 1h.

Fine and cross are not easily sold; we quote \$7 75 for
